SUMMARY

Aspiring Data Scientist with strong foundations in Python, Machine Learning, Data Analysis, and Business Analytics. Experienced in building end-to-end ML pipelines, performing statistical analysis, and delivering data-driven insights through real-world academic and industry projects.

EDUCATION

IIT Madras | Degree - Bachelors in Data Science and Applications | CGPA 7.17
Fergusson College Pune | MSc Computer Science | CGPA 8.7

Jan 2022 – Present
Aug 2025 – Present

PROJECTS

Cinema Revenue Forecasting Project | Python, Pandas, Scikit-learn, LightGBM Sep 2025 – Dec 2025

- Developed a **machine learning pipeline** to forecast cinema revenue using historical movie performance data.
- Performed **feature engineering** on categorical and numerical variables (budget, genre, release timing, promotions).
- Implemented and compared models including Linear Regression, Random Forest, Extra Trees, and LightGBM.
- Used cross-validation and hyperparameter tuning (RandomizedSearchCV) to optimize model performance.
- Evaluated models using **RMSE and R^2 metrics**, selecting an ensemble approach for improved accuracy.
- Achieved **significant performance improvement** through feature selection and ensemble modeling techniques.

Addressing Inventory and Profitability Challenges at Graduate Chai | Pandas, NumPy Sep 2025 – Dec 2025

- Analyzed real-world business data to identify sales volatility, low AOV, and inventory risk patterns.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to uncover trends and anomalies.
- Applied **correlation analysis and statistical techniques** to identify key drivers impacting revenue and demand.
- Built **predictive regression models (SARIMA)** to forecast business outcomes and support decision-making.
- Visualized insights using **Matplotlib and Seaborn**, enabling actionable recommendations for staffing, inventory, and pricing.
- Delivered data-driven business recommendations that led to optimized resource planning and improved operational efficiency.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL (Postgres)
Frameworks: Flask, FastAPI, Django, Vue.js
Tools: Git, Anaconda, VS-Code
Libraries: pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

CO-CURRICULAR ACTIVITIES

Group Leader | IIT Madras | [Link](#) Sep 2023 – Aug 2024

- Led a team of 8 members to organize student activities and bridge communication between students and the administration.

EXTRA-CURRICULAR ACTIVITIES

Public Speaking & Workshop Hosting | [Gallery](#) March 2025
MMCC Pune, Maharashtra

- Hosted Data Science workshops at MMCC, teaching students through hands-on project demos.

Competitive Programming 2023 - Present

- Solved 400+ problems on [LeetCode](#) and [Codeforces](#) to improve algorithmic thinking.

CERTIFICATION

- Understanding Google Cloud Platform Workshop | IITM
- Implementing AI using Azure Workshop | IITM
